PROFESSIONAL SUMMARY

Java Full Stack Developer and 2026 B.E. graduate in Artificial Intelligence & Machine Learning with hands-on experience building production-grade applications using Java, Spring Boot, React.js, MySQL, and RESTful APIs. Experienced in microservices architecture, JWT authentication, CI/CD with Git/GitHub and Docker, and Agile/Scrum practices. Skilled in JUnit testing and applying data structures and algorithms. Certified in Full Stack Web Development (Tap Academy, 2026). Seeking a Junior Java Full Stack Developer / Software Engineer role.

KEY SKILLS

Programming Languages: Java, JavaScript, Python, SQL

Backend: Spring Boot, Spring MVC, Hibernate/JPA, REST APIs, Microservices, Servlets, JDBC

Frontend: React.js, Next.js, HTML5, CSS3, JavaScript

Databases: MySQL, PostgreSQL

Tools & Platforms: Docker, Git, GitHub, Postman, JUnit, JWT Authentication, CI/CD, Agile/Scrum

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, MVC Architecture

PROJECTS

Food Ordering Web Application — Solo Project, Tap Academy **Nov 2025 – May 2026**

Java, Spring Boot, Spring MVC, MySQL, JWT Authentication, Docker, JUnit, GitHub, Postman

- Built a full-stack food ordering web application using Java and Spring Boot, applying MVC architecture to structure a scalable and maintainable codebase.
- Implemented user registration, login, and JWT-based authentication to secure REST API endpoints and manage user sessions.
- Developed core features including menu browsing, cart management, and order placement, backed by a MySQL database for consistent data storage.
- Wrote unit tests with JUnit achieving approximately 80% code coverage, containerized the application with Docker, and designed responsive front-end pages using HTML, CSS, and React.js.

Prep Buddy — AI-Powered Mock Interview Platform **Jan 2025 – Mar 2026**

Next.js, Google Gemini API, PostgreSQL (Neon), Clerk Auth, React Webcam, Vercel

- Built and deployed a live AI mock interview platform (prep-buddy-project.vercel.app) integrating the Google Gemini API with Next.js, using a CI/CD pipeline on Vercel.
- Reduced interview preparation effort by generating 10+ role-specific interview questions per session in real time, with speech-to-text responses captured via React Webcam for a hands-free experience.
- Designed an efficient serverless PostgreSQL (Neon) schema with indexed data structures for persistent, fast per-user interview history retrieval, and implemented secure authentication using Clerk Auth.

EDUCATION

Bachelor of Engineering (B.E.), Artificial Intelligence & Machine Learning **2022 – 2026**
RNS Institute of Technology, Bangalore, Karnataka, India | CGPA: 8.16 / 10

12th Standard (PUC), Karnataka State Board **2022**
PES PU College, Bangalore, Karnataka, India | Score: 87 / 100

10th Standard, CBSE **2020**
Prarthana Central School, Bangalore, Karnataka, India | Score: 87 / 100

CERTIFICATIONS

Full Stack Web Development — Tap Academy, 2026
Curriculum: Java, Spring, Hibernate, HTML5, CSS, SQL, JavaScript

LANGUAGES KNOWN

English, Hindi, Tamil, Kannada
